ACCESS CONTROL | **infinias**

THE SITUATION

Glasscock County ISD is a school district in Garden City, TX. As of the 2018-2019 school year, it had 304 students. Glasscock maintains multiple buildings, comprising two campuses, pre-K through high school. Other facilities include an agriculture shop, cafeteria and concessions, two gyms, and a bus depot.

THE CHALLENGE

Scott Bicknell, Glasscock ISD Superintendent, contacted Wade Williams of VGI Technology after touring a nearby school district's system of more than 100 doors, managed by the infinias system. "We wanted to stop people from entering the school during certain times." Bicknell wanted to secure all the academic settings everywhere on the campus.

"The system is really convenient. Throughout the installation so far, it's been smooth sailing. Overall, it's been a great improvement and now we have a system with very little maintenance needed, just batteries in each of the individual locks."

—Scott Bicknell, Superintendent, Glasscock County ISD

THE SOLUTION

VGI Technology proposed a three-phase access control installation, using a mix of wireless locks from Allegion and wired locks. Phase 3 adds 38 more wireless locks, all managed by the 3xLOGIC infinias access control system, for a total of 135 exterior, classroom, and other doors protected.

THE BENEFITS

- Starting 18 months ago, the district finalized Phase Two plans for over 70 Allegion wireless locks, managed by an existing 3xLOGIC infinias access control system. Phase Two involved wireless locks for internal classroom doors. Phase One of the project saw 60 exterior doors being fitted with both wireless and wired locks.
- Phase Three, ongoing in the Fall 2020, will complete installation of all the wireless locks, making 135 doors under management in total.
- The main school building has three outer doors and all visitors must be buzzed in by intercom. In this way, there is no free flow of outside parties into the building or anywhere around the building during the school day.
- The exterior and interior doors are access card-based, and only staff and teachers are issued cards. Glasscock maintains multiple user groups, each with different access privileges and times.
- Multiple staff members have the infinias application on their phones and these staff can manage the system remotely at any time, from anywhere.

THE PRODUCTS

There's a reason why infinias access control solutions have been trusted for years. Whether leveraging cloud or server-based options, 3xLOGIC provides cost-effective security solutions that are easy to manage, simple to install, and scale with your changing needs.

infinias access control provides the most advanced features of access control management for securing and managing your location(s), within a simple, intuitive browser-based user interface. View, monitor, and report on any or all events and alarms; define multiple security roles, access and privileges for individual users, and the powerful 'rules engine' to perform variety of functions.

ABOUT US

3xLOGIC Inc. has been a leading innovator in server and cloud-based security technology for 15+ years. The company is recognized for providing easy-to-use surveillance and business intelligence solutions that seamlessly integrate video, access control, and disparate data such as ATM, Point-of-Sale, analytics, and more.

3xLOGIC's video surveillance solutions are engineered for ease of installation, scalability and affordability combined with a managed services portfolio that enables integrators to effectively evolve from dealers to high-value strategic partners.
