

VIGIL CLOUD ENHANCEMENTS

VIGIL CLOUD's new enhancements from **3xLOGIC** offer improved functionality that can help dealers and end users reduce costs, increase efficiency, and maximize profits. With features such as 360 De-warping, External Case Sharing, Multi Camera, Multi View, and Edge Based Deep Learning Analytics, businesses can have better control and understanding of their operations, leading to enhanced security and operational performance.

360 De-warping

360 De-warping provides enhanced control and flexibility in monitoring, allowing users to precisely select and customize the areas they want to view. This feature optimizes surveillance efficiency and effectiveness by offering 3xLOGIC 360 cameras four distinct viewing options to cater to specific needs and preferences:

- » Single view (region)
- » Double panorama view
- » Panorama + focus views
- » Quad view

Users will have the ability to select each of the view options and specify the mount type, which include wall and ceiling mounts. Users can pan, tilt, and zoom to objects of interest in both live and recorded videos with each option.

3xLOGIC's CLOUD enabled VX-6M-360-IAW Fisheye camera makes use of the 360 De-warping feature, which allows users to achieve real-time viewing of an entire scene from a single camera.

VIGIL CLOUD offers a plethora of features designed to optimize efficiency, provide users with enhanced control, and support profit growth for businesses. In addition to the brand-new enhancements, here are some other key features that VIGIL CLOUD has to offer:

External Case Sharing

We are excited to announce our new External Case Sharing feature that will significantly speed up our case handling process. With this new feature, you can now securely share cases with multiple external users, allowing them to view clips, videos, and comments within the case.

- » Share your case, securely, with multiple external users
- » External users will be able to view clips, videos and comments within the case
- » Manage external users' access – remove access at any time
- » VIGIL CLOUD case viewing controls and experience (no media players needed)

Multi Camera, Multi View

The Multi Camera, Multi View feature provides you with an efficient way to consolidate the feeds for up to 6 cameras onto a single screen. This allows you to be in control and have a comprehensive understanding of what's happening in your business, all from one convenient location.

- » View up to 6 cameras from one or multiple locations
- » Configurable drag and drop camera layout that best suits your needs and viewing experience
- » Save up to 25 different views for quick access
- » Create cases and individual clips directly from your saved view
- » Jump to a single view format directly from a camera within the multi-view

Edge Based Deep Learning Analytics Person and Vehicle Detection

Make your cameras and data work harder for you and discover solutions to problems you never knew you had with VIGIL CLOUD's Edge Based Deep Learning Analytics. Deep learning models are trained using large amounts of representative data, including challenging scenes with people and vehicles, allowing them to gain a deep understanding of complex environments.

- » Requires X-Series Edge Based Deep Learning Cameras*
- » Powerful CLOUD based detection and notifications
- » Fully integrated UI/UX with easy to view timeline and side panel searches
- » Four zones and detection rules per camera
- » Per camera notifications
- » Easy search options and filters to only see what you want to see:
 - Presence Detection
 - Enter/Exit
 - Loitering (Dwell)
 - Stopped
 - Direction

*These features will be unlocked and available free of charge once connected to Edge Based Deep Learning Cameras.

5MP Resolution Support

When onboarding a camera, dealers can now offer their customers 5MP resolution support to its retention options, this is in addition to the 2MP support already available. Other benefits of the 5MP resolution support include:

- » Customer can change between 2MP and 5MP resolution when required
- » VIGIL CLOUD cameras provide full MP support with the purchase of the camera
- » Enhanced VIGIL CLOUD NVR Plugin Capability - Users can stream to VIGIL CLOUD for retention while at the same time maintaining visibility on the NVR with no configuration changes
- » 5MP support customers will now have 25GB of case management storage available per camera (2MP support provides 10GB storage per camera)

180/365 Day Retention Options

Additional retention options for 2MP and 5MP resolutions are now available for VIGIL CLOUD. Dealers will now have optional 180 or 365 day retention options per camera. As always, dealers can mix/match retention options based on the critical needs of the customers.

Case Management on Mobile App

VIGIL CLOUD's best in class video collaboration functionality - Case Management feature has been extended from its web application to our easy-to-use mobile app. Customers can utilize case management features including:

- » Build cases in the cloud with video clips and screenshots from one or more cameras
- » Share cases with team members for review, comment, and resolution
- » Easily download clips and still shots
- » Find cases by resolution status, location or incident type

Dealer Functionality on Mobile App

VIGIL CLOUD is re-defining the way dealers onboard customers and cameras with the introduction of dealer functionality in our VIGIL CLOUD web app, this provides some great benefits:

- » Increased ROI and RMR (Recurring Monthly Revenue)
- » Easily onboard cameras by using QR scans, greatly improving installation time and setup
- » Remote Maintenance
- » Manage all customers and locations easily using our intuitive CLOUD workflow
- » Identify customers and cameras that need attention
