

The following is a list of added features and issues fixed in the VIGIL Video Management System software suite between VIGIL v12.00.0050 (Oct 22<sup>nd</sup> 2021) and the new release of VIGIL v12.00.0200 (January 24<sup>th</sup> 2022). Each VIGIL product will be listed with its fixed issues and added features contained beneath it in the table. Please contact [3xLOGIC Engineering Support](#) if you have any questions or concerns.

### Column Explanation:

- **Ticket #.** - The listed issue's reference number
- **Issue/Enhancement** - Description of the issue/enhancement

## VIGIL Server - Includes VIGIL Video Verification, VIGIL Media Server, VPOS

Ticket #.	Issue/Enhancement
<b>Added Features</b>	
247534	Adjusted ONVIF Device Manager to disable the highlighted list of selected items when the Save to VIGIL button is clicked.
244267	Added connection count to diagnostic log.
243422	Improved Settings UI for 720p displays.
239010	Adjusted PTZ Preset maximum to 128 for VISIX Gen III Cameras.
235713	Added support for configuration of an NVR camera's Motion Settings.
237327	Removed support for USB cameras.
234922	Added MP4 export interface to VIGIL SDK.NET
229576	Added support for configuration of an NVR camera's Video Motion Alarm settings.
228175	Improved CV22 Dwell Data Consistency.
228172	Added ability to schedule still shots.
224548	Added CSV export option to Audit Log.
222218	Improved registries' handling of stored camera channel settings.
193100	Added audio support for Mp4 Exports.

### Issues Fixed

253229	Fixed issue causing VSU to crash when applying a Motion Alarm schedule and "apply to all Cameras" is selected.
252080	Fixed issue where compatibility assistant popup was erroneously deployed on updates pushed from VCM to Win7 VIGIL Servers
251710	Fixed inaccurate copyright info across several VIGIL suite applications.
250515	Fixed issue where Group / User permissions are not updated on VSU login when pushed from VCM.
248504	Fixed issue where CPNS would fail to send request to DPNS if more than 30 alarm subscriptions exist.
237126	Fixed issue where pushing snapshots from VCM causes several erroneous Windows Event viewer entries.
221423	Fixed issue where Log analyzer's action count was displaying two figures.
221422	Fixed issue with mouse-wheel failing to scroll Audit Log table.
221420	Fixed awkward maximized Log Analyzer UI.

## VIGIL Client

Ticket #.	Issue/Enhancement
<b>Added Features</b>	
245845	Improved text warning dialogue for lack of permissions when attempting search vs no servers connected.
229104	Improved User Group Change process by eliminating unnecessary password prompts.
217952	Enhanced Client Search form (eliminated redundant quick retrieve preset, adjusted layout).
217950	Added auto-load functionality to alarm search thumbnails.
182170	Eliminated access to RapidStream / Seek when Client is Main UI

- 177873** Refactored Save View UI to improve list management  
**99519** Added automatic emailing of Advanced Reporting (employee exceptions)

### Issues Fixed

- 249795** Fixed issue where settings export including site maps fails if site maps folder does not exist  
**249793** Fixed issue where changes to top-level site maps location would not take effect until Client was restarted  
**248308** Fixed issue where Remote Client Motion Alarms form and Alarm priority changes are not being remembered on remote Client or Local Servers.  
**248304** Fixed inconsistencies with Key Request Form between Light and Dark themes  
**248302** Fixed issue with inconsistent display of Search video > Display all form depending on how and when its accessed.  
**248288** Fixed issue where Group permissions Form Search/Filter are not respecting camera selection when applied  
**248282** Fixed issue with Search/filter function in the Group Permissions causing software crash.  
**247777** Fixed issue where User Camera permissions in the individual section not being respected  
**247099** Fixed issue where Test Motion button in remote client will popup server alarm on local Server.  
**246726** Fixed issue where Search Alarms form Priority Field does not display double-digit values as expected.  
**246246** Fixed issue where Audio and Alarms are listed in the Sites treeview for remotely connected Client even when none are configured.  
**246244** Fixed issue where Email Configuration and Settings for connected VIGIL Server deploys an error in Client even though settings are configured and applied successfully.  
**244958** Fixed issue with Picture Quality > Advanced Settings UI cutting off some of the available cameras.  
**244562** Fixed issue where the VIGIL Server Settings > Sub Stream Settings UI is cut off.  
**236927** Fixed issue where deselecting Analytics > Show Objects (live view right click menu) does not change the bounding boxes being drawn overtop of the video stream  
**220587** Fixed issue where Client would fail to automatically re-connect to a VIGIL Server after disconnecting to finalize a settings change.  
**218702** Fixed issue with VIGIL Install Wizard re-deploying several restarts after a fresh install of VIGIL.

## VIGIL Central Management (VCM)

### Ticket #. Issue/Enhancement

#### Added Features

- 248186** Added ATLExternalAnalytics64.dll version reporting to Server details.  
**247775 / 247774** Display VISIX Gen III Plugin Info in Server Details  
**247624** Updated VISIX Gen III external analytics handler to only record dwell time stats >=5 seconds.  
**244288** Improved mouse wheel support on Health Monitor / Jobs grids.  
**243525** Improved Jobs UI responsiveness on scheduling of new jobs.  
**240092** Added support for pushing Recorder and Motion Alarm Scheduled to VIGIL Server  
 Added supplementary information to highlighted data drives in last deleted error state to Server Details > Data Drives node.  
**237897** Added health monitoring for SD Card Health and Storage Percentage Used to Health Monitor.  
**229527** Added logging of VGL file management activities from VCM Client  
**221858** Added logging of VGL file management activities from VCM Client  
**221856** Add migration logging for VGLCache to VGLCache\Global file moves.

#### Issues Fixed

- 250164** Fixed issue where, when selecting the Camera Setup Settings tab on the Server group permissions, cameras 1-10 are deselected.  
**248093** Enhanced Server Details nodes for All-in-One cameras.  
**235225** Fixed issue where job threads can perpetually wait for a job to complete if the VIGIL connect tunnel address changes mid-update.  
**222767** Clarified wording for Matrix controller Status dialogue popup.

## VISIX IP Setup Utility

**Ticket #.**                      **Issue/Enhancement**

---

### Added Features

<b>229520</b>	Added support for VX-20M-SURROUND-OD-RAW to the VISIX IP Setup Utility
<b>237732 / 220586</b>	Added Maximize window control to Detect Online Devices window of the VISIX IP Utility.

### Fixed Issues

<b>244953</b>	Fixed issue where UI log was not clearing when Detect Online Devices button is clicked.
<b>241386</b>	Fixed issue where inputting the incorrect password on VISIX Gen III Cameras via the utility will cause the camera to reboot.
