

VIGIL NVR Case Management

VIGIL NVR CASE MANAGEMENT SECURE AND EFFICIENT CLOUD SOLUTION

VIGIL NVR Case Management provides cloud storage capability to VIGIL NVRs, allowing the storage of sensitive video in cases within the cloud. This standalone solution provides a centralized video archive from where you can pull video clips to share with internal and external stakeholders.

Peace of Mind

Using georedundant cloud storage, VIGIL NVR Case Management ensures customer's sensitive videos are safe and secure on the cloud, giving its users peace of mind. These videos that may be used in situations like crimes, accidents, emergencies, can be retrieved years after the event securely and easily.

Added Dealer Value

In conjunction with the VIGIL Central Management (VCM) solution, VIGIL NVR Case Management enables dealers to provide their clients with an additional value add service, driving recurring monthly revenue.

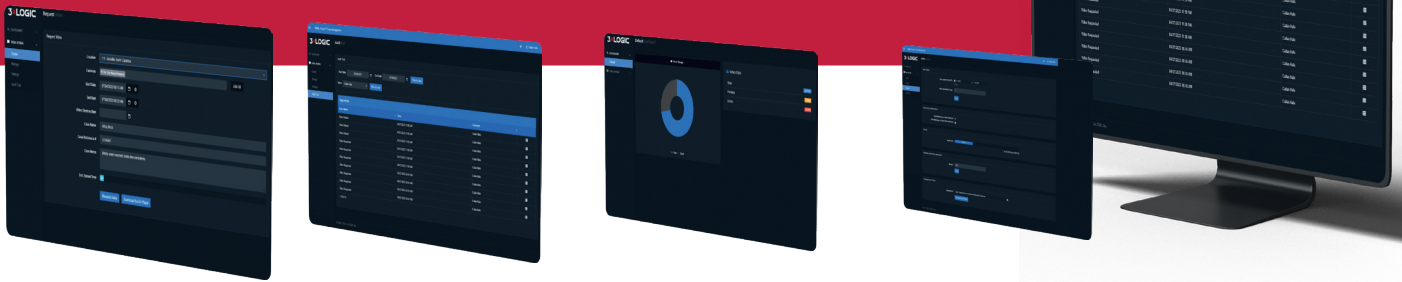

Simplified Solution

End users no longer need to manage retrieval of multiple video clips from NVRs by going to the NVR directly to access them. They are able to use a single location to save and retrieve a clip, set data expiration dates and other video management functions.

NVR Case Management Key Features:

- » **Remote video retrieval and storage** at times you define for your 3xLOGIC NVRs
- » **Video management:** set (optional) expiration dates
- » **Update the Case:** add additional clips at a later date
- » **Watermarked video retrieval:** extract and save video to send to 3rd parties
- » **Standalone application** – no additional hardware costs

Use Cases

- » Centralized Retrieval and cloud storage for sensitive video clips
- » Long term case and media storage

Verticals

- » Public Venues
- » C-Stores and other Retail sites
- » Job-sites, construction, warehouses and factories
