

HARVEST

HOUSE OF CANNABIS

Harvest Health & Recreation
Standardizes on 3xLOGIC
infinias Access Control

3xLOGIC
ACCESS CONTROL | **infinias**

THE SITUATION

Headquartered in Tempe, Arizona, Harvest is a multi-state cannabis operator and vertically integrated cannabis company. Subject to completion of announced acquisitions, Harvest will have one of the largest footprints in the US cannabis industry. Since 2011, the company has been committed to expanding the Harvest House of Cannabis retail and wholesale presence throughout the U.S.

THE CHALLENGE

“We want to be able to control who goes where, regardless of the facility. For example, why might an employee be in an area they shouldn’t? Our access control has to enable us to track who, when, and where. Our system has to be able to grant access to someone for a particular door, and then after hours, that access is shut down.” T.J. Buskirk, National Security Director for Harvest Health & Recreation.

THE SOLUTION

To date, Dem360, the security system designer and integrator, has installed infinias access control in 30 facilities, controlling over 400 doors. The next big milestones in this system-wide rollout is to convert all current facilities to 3xLOGIC’s infinias

CORPORATE Edition, install CORPORATE going forward, and migrate all managed doors to a scalable data center with a single database built on redundant, fault-tolerant architecture.

“The infinias system is very user-friendly, that was one of our key demands. It’s satisfying all our needs, and we’re able to manage our facilities remotely. The robust system features and benefits meet the varying demands of the dynamic, high-growth Harvest environment and our vision for the future.”

—T.J. Buskirk,
National Security Director for
Harvest Health & Recreation

THE BENEFITS

- Harvest has standardized on 3xLOGIC infinias access control for all its current and future locations. In this line of business, Harvest must be sensitive to the many different state rules and regulations. infinias access control gives them interoperability from state to state, as well as personnel trackability and clear audit trails for state regulators.

THE BENEFITS (CONTINUED)

- Dem360 has installed infinias at 30 locations with over 400 doors. Eventually, all doors at hundreds of facilities will be managed by infinias CORPORATE edition all monitored and controlled from a single, central data center.
- With a growth trajectory like Harvest's, the infinias system's reliability and scalability are essential features. Eventually, Harvest's Security Operations Center will have full visibility across every company facility 24/7/365.
- TJ Buskirk: "Infinias gives us what we need without impediments. We've never had to 'forklift' anything. This system adapts and it gives us flexibility and scalability, we have one door at this facility and hundreds of doors at another. The infinias system has been able to react to the Harvest environment of change and fast-paced growth."

THE PRODUCTS

infinias CORPORATE provides the most advanced features of access control management for securing and managing your location(s), within a simple, intuitive browser-based user interface. The software allows you to view, monitor, and report on any or all events and alarms; define multiple security roles, access, and privileges for individual users; and the powerful "rules engine" performs a wide variety of functions.
