ACCESS CONTROL & VIDEO | **infinias**

THE SITUATION

NLP Logix automates repetitive tasks now done by humans. Using its suite of algorithms and proprietary technology, NLP Logix automates such things as interpreting imagery, matching candidates to job requirements, extracting text from documents, or as CEO Ted Willich puts it, "We do AI, we teach machines to do things humans do."

THE CHALLENGE

NLP Logix occupies half of the first floor of a multi-tenant office building. During a recent Florida hurricane, Willich, his wife, and several employees sheltered at their offices when they became aware of possible looters around the building. None of the party could see the front door, the hallway leading to the office door, or the first-floor main entrance to the building. "We didn't have the visibility we needed to feel better about our situation. Providing excellent security for our employees is very important, and we wanted to achieve greater peace of mind overall about our security," stated Willich.

THE SOLUTION

Relying on their integrator Bates Security's expertise and recommendations, NLP's new integrated access and video management system includes four 3xLOGIC cameras covering three points of entry into the offices and one camera that covers the main entrance to the building. Bates' lead commercial consultant, Scott Green, designed the system to accomplish the goals clearly laid out by his client.

> *"One of our fellow tenant companies was so impressed, he asked for the contact information for Bates Security— he's looking into getting the same system for their offices.»*
>
> **— Ted Willich, CEO, NLP Logix**

THE BENEFITS

- In short, with just four cameras, "We now have total visibility," commented Willich.

- All senior staff have installed the 3xLOGIC mobile app, which enables them to pull up camera views on their phones, as well as through the web application on laptops or other devices.

- For access control, all employees have a key fob, but system management functions such as remotely locking or unlocking doors can only be done by senior staff.

THE BENEFITS (CONTINUED)

- After a few months operating the system, Willich stated, "This is a significant upgrade from our previous system, the video images have great resolution. The video streams in lower resolution to keep network demand low, and we can do playback of events and when people access the system.

- 3xLOGIC's integrated access control & video management system achieves the most powerful commercial feature set at a price that fits the budget for the smallest business owners up to growing companies like NLP Logix.

THE PRODUCTS

3xLOGIC infinias Integrated Access Control and Video Management Software breaks new ground by providing the power you need in the smallest form factor in the industry. Access Control and Integrated Video has never been easier to install. There are no wires from the access control system to the video system, all data exchange is through the software. Total ease of installation has been achieved by developing an automated, cloud-based programing tool. Just a simple scan of a QR code from a smartphone and installation is virtually complete! The solution is the most powerful commercial feature set at a price that fits the budget for even the smallest business owners.
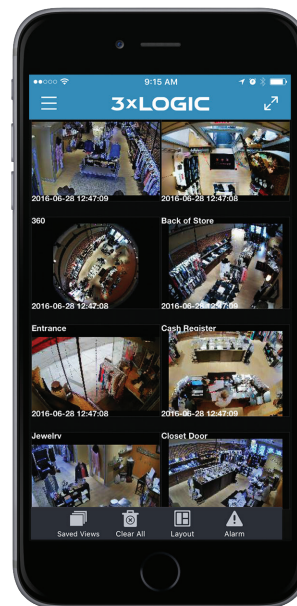

- Single person installation
- No server or monthly maintenance
- Patented video verification
- Lowest cost in the industry

3xLOGIC VISIX IP Cameras come in all shapes and styles, offer the performance and clarity you demand, and have the best pricing on the market. With VISIX IP Cameras, you have the flexibility and freedom to choose the camera that fits your needs without compromising.

View Lite II Mobile App is a mobile app designed to allow a user to connect to and view V-Series standalone cameras and cameras connected to a VIGIL VMS Server. With a simple drag-and-drop interface and 9 different layout options, you can easily view up to 48 live camera feeds simultaneously.

- Unlimited number of VIGIL Servers and V-Series cameras
- QR Code Scanner to quickly add VIGIL Servers
- POS/ATM OSD for live and playback
- POS Search and POS Reports with one-click POS event playback footage
- Alarm push notifications
- 3xCLOUD account integration
