# Field of Dreams Movie Site Installs 3xLOGIC Video Surveillance System After Vandalism Incident

**3xLOGIC**
VIDEO MANAGEMENT | VIGIL

## THE SITUATION

"Field of Dreams," released in 1989, is a movie that has inspired millions and became an Academy Award nominee for Best Picture of the Year. "Nearly thirty years later, we still get more than 110,000 visitors a year," said Denise Stillman, Manager of the Field of Dreams movie site. "Most folks come to run the bases or explore the corn field. We're the only ball park open 365 days a year, and we're the world's largest pick-up baseball game."

## THE CHALLENGE

"In April 2018, there was an act of senseless vandalism that occurred on this high-profile ball field and a lot of damage was done by someone with a very poor sense of judgement," explained Carl Bracken, Technical Security Sales for the integrator Ci3. The vandalism to the field was fairly extensive and, unfortunately, also involved destruction of expensive irrigation equipment. Bracken contacted Denise Stillman to explore installing a video surveillance system for the tourist site.

## THE SOLUTION

Bracken continued, "The president of Ci3 shot me a text before I even knew about the vandalism, suggesting we get involved and try to help." After initial discussions Bracken visited the site, with demo gear in hand, to show Stillman

the possibilities. She was keen on what she saw but there was nothing in the budget for such a system. Working with his company president and reaching out to various vendors, including 3xLOGIC, Bracken came up with a plan to provide the Field of Dreams (FOD) with the asset protection and increased

> *"This new system really gives us peace of mind when no one is on site. We now have excellent visibility to areas we must be able to see and the system provides a great deterrent effect, too."*

security they needed. Bracken and his team completed an installation comprised of a 3xLOGIC 8-channel V250 NVR; one 3xLOGIC thermal imager, pointed at the bridge leading to the site entrance; a 3xLOGIC 3 MP mini-dome to cover the retail sales area; and two cameras covering the field itself.

## THE BENEFITS

- "Now that the system is in place, it's doing a lot of things for us. The gift shop staff feels much more confident now that they have eyes and ears watching over them," Denise Stillman, FOD Manager

## THE BENEFITS (CONTINUED)

- Stillman has a sense of comfort that wherever she is in the world she can see what is happening at the field at all times. "I can even check if the sod is greening up. I love that, and the 3xLOGIC mobile app, View Lite II, is easy to use and empowering."

- Staff now have excellent visibility to areas critical for monitoring and the system provides a great deterrent effect, too.

- This Field of Dreams site is important to the fabric of Iowa life and lifestyle, and the new system gives Stillman and her staff peace of mind when no one is on site.

## THE PRODUCTS

**VIGIL™ V250 Series NVR's** are fully-integrated intelligent video appliances. Pre-configured with VIGIL VMS software, these NVRs represent a cost-effective video management platform that provides all the key functionality of VIGIL VMS with unrivaled ease of setup.

**The 3xLOGIC VERA thermal imager** allows you to see where you never could before. When using high-contrast thermal imaging, the results are a dramatic reduction in false alarms. Unlike standard thermal imagers, VERA provides the advantage of verification and detection in an all-in-one device.
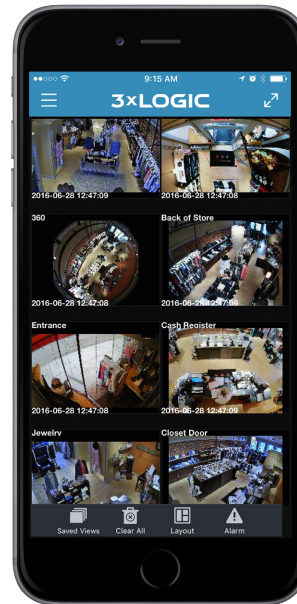

**High-Definition IP vandal dome cameras** are the perfect combination of form and function, providing dual-streaming high-definition video for network video surveillance applications requiring superior clarity and detail in varying

lighting conditions.

**View Lite II** is a mobile app designed to allow users to connect to and view V-Series standalone cameras and cameras connected to a VIGIL VMS Server. With a simple drag-and-drop interface and 9 different layout options, you can easily view up to 48 live camera feeds simultaneously.

- Unlimited number of VIGIL Servers and V-Series cameras

- QR Code Scanner to quickly add VIGIL Servers

- POS/ATM OSD for live and playback

- POS Search and POS Reports with one-click POS event playback footage

- Alarm push notifications

- 3xCLOUD account integration
