

## VIGIL V-POS (Point-of-Sale) v11.5

Contact us today for a product demonstration:

■ 1.877.3XLOGIC

Employee theft is one of the single largest causes of shrinkage in retail environments today. Millions of dollars disappear from Point-of-Sale (POS) terminals in retail stores on a daily basis due to fraudulent or criminal employee activities. The ability to effectively detect and deter cashier-related shrinkage is a top priority for retailers worldwide. One way that retailers are confronting this epidemic is by identifying the telltale patterns of these crimes or so called POS exceptions.

3xLOGIC's Point-of-Sale module, VIGIL V-POS, is a plugin that can be enabled on any 3xLOGIC VIGIL Server running software version 6.0 or higher. V-POS Search can then be accessed remotely via VIGIL Client, granting the user unparalleled access to POS/ATM data and related data stored in VIGIL Server's database. By establishing a set of user-defined and flexible exception-based rules within VIGIL Point-of-Sale, Loss Prevention (LP) investigators can receive real-time alerts anytime that events or actions fall outside of these parameters. This feature and many more found in VIGIL V-POS open several new possibilities to seeing your business, big or small, differently.

### Features

- Advanced POS Exception Reporting with daily, monthly and yearly reports.
- Full Integration with VIGIL Client's Shift Analysis Report
- Access to a library of over 160 POS and ATM integrations
- Fully searchable receipt data available remotely through Client or the View Lite II mobile app
- Synchronized video and POS data
- On-Screen Display of data in live, playback, and exported video
- Export of data into multiple formats for easy import into other programs
- Create local alarms and email alerts based on specific criteria
- Classify suspect transactions for review and escalation
- Configurable number of days of data storage
- Unlimited number of registers per site
- Map any number of registers to any number of cameras

### Ordering Information

VGL-SW-POS-1

VIGIL V-POS License Key

**NOTE:** Only one V-POS license key is required per 3xLOGIC VIGIL Server VMS.

The screenshot displays the VIGIL V-POS interface. On the left is a navigation pane with options like 'Review Stations', 'Servers', 'Camera', and 'POS/ATM Live'. The main area shows a live video feed of a cashier at a register. Overlaid on the video is a 'POS/ATM Data (Live) - R...' window showing a table of transactions with columns for Qty, Item, Amount, Code, Req #, Cashier, and Receipt. Another window, 'POS/ATM Report', is also visible, showing a list of exceptions with columns for Event ID, Description, Timestamp, Receipt #, Cashier, Register, Item, and Event.
