

You do not know what you're missing.

ONE END USER ACCIDENTLY

Turned off a camera that provided views of a parking area. VCM immediately sent an alert to the MSP, and the security administrator contacted the end user to get the camera back online.

Within 48 hours, the video surveillance system caught two perpetrators throwing a brick through a car window in the parking area and making off with a purse. The video images were extremely clear, and enabled the police to apprehend the suspects based on the video evidence. Without VCM, it's very likely the camera would have remained down, and the incident left unrecorded.

3xLOGIC's VIGIL Central Management Adds Value To Our Clients

“With 3xLOGIC's VCM as part of our full-service maintenance system, we offer a whole new level of service, a true managed service. Now, we know when a camera is down before the end user does.” Unlike in the past, when you found out a camera was malfunctioning because you had no video of that recent incident you really needed to see.”

“VCM as part of a managed services offering significantly strengthens our value proposition. Our clients can rest assured that their cameras and video servers are functioning and that they will deliver video when it matters most.”

3xLOGIC
CENTRAL MANAGEMENT | **VIGIL**

VIGIL CENTRAL MANAGEMENT

Effectively manage and monitor multiple 3xLOGIC VIGIL Servers and VISIX cameras over your IP network.

3xLOGIC
CENTRAL MANAGEMENT | VIGIL

SYSTEM ANALYSIS

Proactive and predictive analysis of system status and performance for a single unit or multiple systems on a global basis

CAMERA HEALTH

Provide VIGIL Server, NVR, and VISIX camera health and understand the status of each component of your video security infrastructure

MONITORING EVENTS

Email/text alerts of health monitoring events—number of recording cameras, hard drive storage, processor utilization, and more

DESIGNED WITH THE INTEGRATOR IN MIND

User account and permissions management

Automatic, remotely deployable VIGIL Software Suite updates

Back-up and storage for Server configuration files

Never need to calculate cost of system downtime—with VCM, you have maximum system uptime
